DETAILED ACTION

In view of the Appeal Brief pages 4-5, filed 06/18/2007, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 9-12 and 14-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Lumb (U.S. Patent No. 3,426,364).

Lumb discloses a spinal reconstruction apparatus (see attached marked-up figure), comprising a superior facet complex including a plate having an upper portion, a lower portion, and a vertical midline, with the upper portion being adapted for fixation to an upper vertebral body; a pair of inferior gliding arms (ref. #54) extending downwardly from the lower portion of the plate on respective sides of the midline, each gliding arm having a longitudinal axis, an upper end with a first coupling to the superior facet complex, and a lower end with a second coupling to a lower vertebral body; at least the first coupling providing a limited degree of axial movement of each gliding arm to facilitate flexion, extension, and lateral bending.

Art Unit: 3733

The upper portion of the plate utilizes pedicle fixation. The lower end of each gliding arm utilizes pedicle fixation. The first coupling includes a slot on the plate and a pin on the gliding arm that slides along the slot. The second coupling provides a limited degree of axial movement of each gliding arm. The second coupling includes a slot on the gliding arm and a pedicle screw with a pin that engages with the slot. The first coupling provides a limited degree of pivoting from side to side. Each gliding arm extends downwardly and away from the midline at an angle. The superior facet complex further includes an outer surface with soft tissue attachment points.

Also, with regard to the statements of intended use and other functional statements, e.g. "the upper portion being adapted for fixation to an upper vertebral body", and "a lower end with a second coupling to a lower vertebral body", they do not impose any structural limitations on the claims distinguishable over Lumb, which is capable of being used as claimed if one so desires to do so. *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Furthermore, the law of anticipation does not require that the reference "teach" what the subject patent teaches, but rather it is only necessary that the claims under attack "read on" something in the reference. *Kalman v. Kimberly Clark Corp.*, 218 USPQ 781 (CCPA 1983). Furthermore, the manner in which a device is intended to be employed does not differentiate the claimed apparatus from prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Allowable Subject Matter

Claims 8 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
